

Tomorrow is on

Enbridge delivers the energy that fuels quality of life.

At Enbridge, our goal is to be the first-choice energy delivery company in North America and beyond – for customers, communities, investors, regulators and policymakers, and employees.

We operate in five of the G7 countries – the United States, Canada, the United Kingdom, France and Germany. As a diversified energy company, we are uniquely positioned to help accelerate the global transition to a cleaner energy future, and we're doing it in ways that are ethical, sustainable and socially responsible.

We're advancing new low-carbon energy technologies – including hydrogen, renewable natural gas, and carbon capture and storage. We're committed to reducing the carbon footprint of the energy we deliver, and to achieving net-zero emissions by 2050.

We also recognize the importance of a secure, reliable and affordable supply of energy. We safely connect millions of people around the world to the energy they rely on every day through our four core businesses – natural gas pipelines, liquids pipelines, gas utilities and storage, and renewable energy.

Through our cross-continent natural gas transmission pipeline system, we deliver about 20% of the natural gas consumed in the U.S. – and serve the rapidly expanding North American LNG export market. In the Gulf Coast, we serve 15% of LNG export capacity, and expect to double that number by 2030. In Canada, we're integral to all West Coast LNG export projects aiming to serve growing global markets.

We move about 30% of the crude oil produced in North America, and load about 25% of the continent's crude exports via our Enbridge Ingleside Energy Center (IEIC).

Enbridge operates North America's largest natural gas utility by volume, serving 75% of Ontario's population. Enbridge Gas was the first utility in North America to blend renewable hydrogen gas into its distribution system, and continues to pioneer lower-carbon energy sources.

Enbridge was an early investor in renewable energy, and we have a growing offshore wind portfolio in Europe. Collectively, our interests in renewable energy projects in operation or under construction have capacity to generate nearly 2.2 net GW of zero-emission energy.

We value safety, integrity, respect, inclusion and high performance. Above all else, we aim to make a difference, economically and socially – as an industry leader, as a responsible corporate citizen, as an exceptional employer.

Enbridge has been selected to Bloomberg's Gender Equality Index five years running, most recently in 2023; we've been named to the Dow Jones Sustainability Indices' (DJSI) North American index 14 times, most recently in 2022; we've earned an A-minus climate change grade from the Carbon Disclosure Project (CDP) for three straight years, most recently in 2022; and we have been ranked among Canada's Top 100 Employers 20 times, most recently in 2023.

Enbridge Inc. is headquartered in Calgary, Canada. We have a workforce of more than 12,000 people, primarily in the United States and Canada. Enbridge (ENB) is traded on the New York and Toronto stock exchanges.
